HALLDE launches stainless steel cutting tools

HALLDE has developed a completely new series of cutting tools for our combi machines, the CC-32S, CC-32 and CC-34 and our vegetable preparation machines RG-50S and RG-50. The cutting tools are made of stainless steel, which simplifies and improves hygiene and cleaning. Naturally, the cutting tools are machine washable.

The new series covers the following cutting tools:

- Slicer 1 mm
- Slicer 2 mm
- Slicer 4 mm
- Slicer 6 mm
- Crimping slicer 4 mm
- Grater/shredder 2 mm
- Grater/shredder 4 mm
- Grater/shredder 6 mm
- Julienne cutter 2x2
- Julienne cutter 4x4

For information on the product range, contact our International Sales Manager Joakim Baringe, our Nordic Sales Manager Malin Annebäck or our order department, tel. +46 8 587 730 00.

More information can also be found at the HALLDE website hallde.com.

With 70 years of experience and a number of important patents HALLDE is now a world leader within the development and manufacture of commercial food preparation machines. HALLDE products are sold in more than 80 countries all over the world. HALLDE products follow hygiene, safety, and quality norms (i.e. NSF, UL, EEC, CE etc.) and the HALLDE company is certified in accordance with quality standard ISO 9001.
