80 YEARS HAS PAST AND HALLDE CONTINUES TO SIMPLIFY LIFE IN THE KITCHEN

One evening, as Ernst Häll watched his wife cut potatoes into julienne for the traditional Swedish dish “Jansson’s Temptation”, he got a brilliant idea. Cutting might not be difficult but tedious and time consuming.

A small machine for cutting vegetables made it possible to serve this icon in the Swedish cuisine despite increasing wages and standards of efficiency.

HALLDE was founded in 1941
by the inventor Ernst Häll

HALLDE Workstation

– Accessories for organised and simplified kitchen life

Keeping the kitchen neat and tidy is essential for chefs, making professional equipment a prerequisite. HALLDE has widened the range to include accessories that simplify kitchen life even more; different sizes and designs of container trolleys and a practical basin trolley useful when pickling vegetables, are now available.

RG-400i - when the demands on capacity are the greatest

RG-400i is HALLDE's largest and most effective Vegetable Preparation Machine that prepares very large volumes and can be advantageously integrated into a production system.

TRAY FOR PREPARING DICED FOODS AND POTATO CHIPS - ALSO FACILITATES CLEANING

In order to simplify cleaning the tray is placed in the bottom of the machine base, which is then kept free from the product that is being prepared. When the preparation is complete, simply remove the stainless steel tray from the machine and clean it in the dishwasher. The need for cleaning the machine base by hand is thus minimised, all for the best hygiene.

The tray is always used when preparing products using the Dicing Grid or Potato Chip Grid. This is also recommended when preparing products using other cutting tools.

Vegetable Preparation Machines with locks – a safe choice

With HALLDE Vegetable Preparation Machines, you can slice, shred, dice, crimp and Julienne cut vegetables, fruit, cheese and chips in a variety of different dimensions and sizes, depending on the cutting tool and the model of Vegetable Preparation Machine used.

HALLDE Vegetable Preparation Machines use stainless steel cutting tools. The blades are interchangeable and very sharp in order to deliver perfect cutting results. The machines have an efficient start/stop function for safe feeding and can be supplied with a protective cover and lock to prevent unauthorised personnel from accidentally starting the machine. This applies to environments such as kitchens in nursing homes, school canteens, prisons or other places where safety is high priority.

Choose the right model!

All HALLDE Vegetable Preparation Machines are manufactured with carefully selected high-quality materials. They are easy to clean and equipped with handles for easy moving, and each model is adapted to different needs with various capacities. On hallde.com you can read more about which model is best suited to your needs.

WHAT MODELS ARE AVAILABLE WITH LOCKS?

The models RG-100, RG-200, RG-250 and RG-350 can be ordered with a protective cover that covers the start and stop button. The user locks the machine with a removable padlock.

The models RG-300i and RG-400i can be ordered with a lockable stop button. When the red button is pressed, the machine stops. To start the machine again, the red button must be unlocked with a key before you can press the green start button.
